## PROJECTS

### Amazon Clone | HTML, CSS

- Built a static front-end clone of Amazon's homepage.
- Focused on layout structure, styling, and responsive design using pure HTML and CSS.

### User Authentication with backend

- Developed a secure user authentication system using Node.js, Express.js, and EJS, implementing login, registration, and session management.
- Integrated JavaScript-based validation and encrypted password handling to ensure data privacy and enhance application security.

### Grocery site | react, CSS, JavaScript, MongoDB, Nodejs.

- Designed a fully responsive website for a Grocery with dynamic features like a menu toggle and interactive image and cards with Products.
- Enhanced user experience using JavaScript for smooth transitions and interactivity.

### Clothing Brand Site ("Nijer") | HTML, CSS, JavaScript

- Developed a personal clothing manufacturing website showing casing products, contact forms, and interactive elements.
- Implemented responsive design for mobile and desktop views, simulating an e-commerce layout.
